

## Sets, Kits and Outfits (SKO) Flow

1. *Defines the Master Stock Number for the SKO and defines the Item Stock Numbers for the parts which make up the assembly.*
2. *Identifies the items to create the kit by selecting the specific inventory.*
3. *Sets the **Cost Center/Personnel** and identifies items to pick.*
4. *Records items which were physically moved based on the **Materiel Movement Plan**.*
5. *Assembles the SKOs using the selected inventory. The option to send the SKOs to **Quality Control** is available.*
