**MARCORLOGCOM PRODUCTS & SERVICES
PRODUCT/SERVICE DEFINITION**

As of: Monday, March 23, 2015 13:23

1. PRODUCT/SERVICE TITLE: The official name of the Product and Service
Joint Chemical Biological Radiological Nuclear-Defense Equipment Fielding and Sustainment

3. LEAD ORGANIZATION: Name of the organization overseeing the Product and Service.
Logistics Services Management Center (LSMC)

6. DESCRIPTION: A detail description or definition of this Product and Service (it's function, purpose, reason for existence.)

JEFS has roles and responsibilities for elements of life-cycle management of CBRN-D equipment for the DoD. In this role, JEFS conducts three primary missions: (1) Fielding & Surveillance, (2) Test Management Services (TMS), and (3) Defense Accountability Reutilization and Disposition (DARD).

Fielding and Surveillance Teams (FST):

Conduct on-site Base Line Surveillance in conjunction with fielding events of newly procured items and material. Assist the Joint Project Managers (JPMs) and JPEO-CBD by identifying, reporting and analyzing production issues and deficiencies in an effort to improve product quality.

The FST also provides support to the overall fielding event. By request, the FST's will schedule and conduct CBD equipment surveillance site visits for the services. Surveillance site visits provide unit commanders with invaluable feedback on their CBD equipment readiness and also provides training to CBD personnel on proper care, maintenance and storage procedures for CBD equipment.

Test Management Services (TMS):

Develop and maintain technical expertise in support of DoD requirements for Production Lot, Fielding and Sustainment Testing as necessary to accomplish Total Life Cycle Management of CBRN-D Equipment.

Defense Accountability, Reutilization and Disposal (DARD):

Maintain accountability and proper disposal of all CBRN-D assets identified as controlled items. Maintain accurate records of receipt, inventory, disposal, training, recycle and serviceable assets. JEFS, DARD project will utilize better business practices for process improvement and cost efficiencies and ensure proper demilitarization or recycling of unserviceable CBRN-D equipment under their control.

Internet Sales Monitoring of CBD Equipment:

JEFS is tasked with providing an ongoing internet search capability to identify sellers offering select CBD products on Internet Trading Platforms (iOffer, Craigslist, eBay, Sell.com), Trade Boards, and Online Retail Sites. Infringing sellers are reported for immediate removal to each of the platforms covered in order to prevent these items from being sold to the public.

Additional chartered responsibilities include:

Establishing Joint Service standards for surveillance, assessment, and reuse of fielded CBD equipment; Assisting JPMs throughout the systems acquisition process and providing a Joint Service perspective for the planning and inclusion of surveillance, assessments, and proper disposal of equipment; Recommending and establishing policies for all surveillance/cyclic testing requirements through the Joint Service Technical Working Group and the JLAC-CBD; and Providing technical assistance as required/requested by the Services in the performance of their Title 10 responsibilities for operations and sustainment of CBD equipment.
