WHAT IS VPP?

- VPP provides a process, a culture, and not an “inspection”
- VPP promotes safety as a core value
- VPP wants safety to be a habit
- VPP is committed to safety of Command individuals
- VPP and the Command will reap the benefits of safety

Three Stages of VPP

- Initial development of policies, procedures, and programs
- Communicate to site, train personnel, implement
- Full implementation, continuous improvement

Four Management Principles of VPP

- Management Leadership and Employee Involvement
- Work Site Analysis
- Hazard Prevention and Control
- Safety and Health Training

MANAGEMENT LEADERSHIP

- Managers must provide visible leadership by:
 - Establishing clear lines of communication
 - Creating an environment for reasonable employee access to top management
 - Clearly defining responsibilities, goals, and objectives
 - Setting example of safe and healthful behavior
 - Ensuring all workers, including contractors, have high-quality safety and health protection
 - Engineering out of unsafe conditions

EMPLOYEE INVOLVEMENT

- The site culture must enable meaningful employee involvement:
 - Participation in committees, audits, investigations, work area self-inspections, job hazard analyses, etc.
 - Awareness of VPP site participation
 - Hazard reporting
 - Near Hit Program
 - Receive feedback - suggestions, reports, etc.
 - Safety training
 - Demonstrate understanding the basics of VPP.

WORKSITE ANALYSIS

- Work Site Analysis includes:
 - Baseline Safety/Health Hazard Analyses
 - Ongoing Hazard Analysis
 - Pre-use Analysis (materials/processes)
 - Document and use hazard analysis
 - Routine Inspections / Self Inspections
 - Employee Hazard Reporting System **without fear of reprisal**
 - Industrial Hygiene
 - Accident/Incident Investigations
 - Trend Analysis

HAZARD PREVENTION AND CONTROL

- Hazard Prevention and Control includes:
 - Access to qualified Safety/IH professionals
 - Control hierarchy (engineering, administrative, work practice, Personal Protective Equipment (PPE))
 - Preventive/predictive maintenance to keep equipment from becoming hazardous
 - Access to medical/health professionals for physicals, treatment, first aid, CPR, etc.
 - Emergency systems (response, training, drills, critiques)
 - Controls are understood, followed, and enforced

SAFETY AND HEALTH TRAINING

Safety and Health Training includes:

- VPP concepts
- Employee rights under OSHA
- Responsibilities of managers, supervisors, workers
- Recognizing hazardous conditions
- Signs and symptoms of workplace related illnesses
- Site hazards and protective measures
- Emergency evacuation procedures

SAFETY AND HEALTH TRAINING

(continued)

– Job specific training examples:

- Job hazard analysis / protective measures
- Work area inspection
- Self-inspection
- Mishap investigation
