## LENS COVER

MDMC was asked by PM-FIRES to redesign the Lens Cover for the (Common Laser Range Finder-Integrated Capability (CLRF-IC) range finder. The rubber tabs were breaking off after use and due to the high cost (\$2,700.00) and low availability the range finders were dead lined. MDMC was able to redesign a 3D printed polymer replacement that was repairable, at a cost of (\$197.00). MDMC and PM-FIRES were able to increase readiness of CLRF-IC range finder in the FMF (Fleet Marine Force).
