G/ATOR ROCKING FOOT ASSEMBLY

G/ATOR = Ground / Air Task Oriented Radar

MDMC in coordination with PM-G/ATOR printed a G/ATOR Rocking Foot assembly out of MS1 Maraging Steel. G/ATOR system is new, and the Rocking Foot had a long lead time. The original part was casted, and DLA had not found a source to fabricate this Rocking Foot. MDMC was able to reproduce a stronger part for a similar cost to the casted part, increasing readiness for the FMF (Fleet Marine Force).
