

Products & Services

1) Maintenance Planning for Acquisition

MMC serves as a Logistics Element Manager (LEM) for weapon systems maintenance planning. Serving as the LOGCOM representative for the Depot Source of Repair (DSOR) process, the LEM works with members of Marine Corps System Command (MSCS), PEO Land Systems, and Joint-Services to develop the Initial Life-cycle Maintenance Planning Core Logistics Analysis (CLA), Level of Repair Analysis (LORA), Source of Repair Analysis (SORA), Depot Maintenance Introduction (DMI) Review and Analysis, and other DSOR decisions.

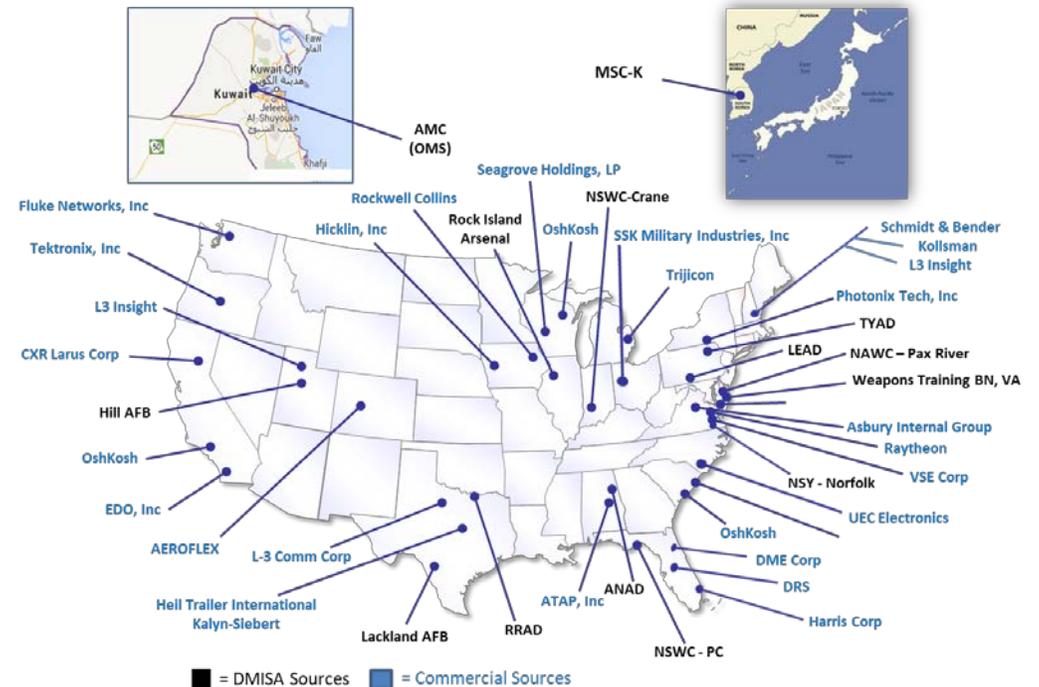

CUSTOMERS	
Internal	G3/5, G6, LSMC, MDMC, WSMC
External	DON, HQMC, MCSC, Other Services/DoD Agencies

2) Maintenance Workload Planning and Scheduling for Sustainment

MMC has the responsibility to source and schedule all Depot Maintenance workload through Organic, Depot Maintenance Inter-Service Support Agreement (DMISA), and Commercial Sources of Repair (SOR). The MMC must monitor depot level maintenance requirements to ensure each SOR has the capability and capacity needed to accomplish the required work.

CUSTOMERS	
Internal	G3/5, LSMC, MDMC, MFSC, QMC, WSMC
External	DON, HQMC, MCSC, OSD, Other Services/DoD Agencies

3) Depot Level Maintenance Performance Analysis

MMC has the responsibility to monitor and perform analysis of workload and financial execution to oversee depot workload cost, schedule, and quality performance activities, cost estimates and parts forecasting.

CUSTOMERS	
Internal	G3/5, LSMC, MDMC, QMC, WSMC
External	DON, HQMC, MARFORs, MCSC, OSD, Other Services/DoD Agencies

4) Accountability and Visibility of Materiel in Repair

MMC is the custodian of Marine Corps assets inducted for depot repair at DMISA and Commercial sources of repair. Representatives from our center conduct on-site inventories and validate accountability records in support of FIAR requirements.

CUSTOMERS	
Internal	G3/5, G8, WSMC
External	HQMC, DMISA & Commercial Activities

5) Technical Maintenance Inspections and Assistance

MMC provides technical assistance and maintenance support for ground weapon systems in order to enhance the Marine Corps' equipment readiness and sustainability. Serving as a customer technical representative, MMC can assist with technical and quality inspection support to all DSORs to ensure the quality and timely acceptance of completed workload.

CUSTOMERS	
Internal	G3/5, BIC, LSMC, MDMC, MFSC, WSMC
External	MARFORs, MSCS

6) MARFORs Maintenance Solutions and Support

MMC provides overflow maintenance support to the Marine Forces and Intermediate Maintenance Activities by utilizing other Services support or Contracted Logistics Support to facilitate requirement execution.

CUSTOMERS	
Internal	G3/5, BIC, LOGCOM FWD, MDMC, MFSC, QMC, WSMC
External	MARFORs

7) Strategic Maintenance Initiatives and Capability Analysis

MMC provides operational management, capability analysis, and maintenance data integration. Our team collects, organizes, and computes DoD-level capability analysis such as Core, Capacity, and 50/50 reporting. MMC reviews DoD-level policies that impact Marine Corps Maintenance Management, and support external strategic initiatives.

CUSTOMERS	
Internal	G3/5, G8, MDMC
External	DON, HQMC, MCSC, OSD, Other Services/DoD Agencies, U.S. Congress
